The ITC Conference Grant Selection Committee will carry out the evaluation of applications taking into account: an efficient and cost-effective use of funds, focusing on activities and resources that directly contribute to the Precision-BTC-Network objectives, and the potential for enhancing the research interaction between the parties involved, measured by the impact of the exchange expected by the applicants and collaborators. Specifically, the evaluation of the application is based on the following criteria:

Examples of conferences typically considered include but are not limited to: European Association of Liver Disease (EASL) congress, EASL Liver Cancer Summit (LCS), European Society for Medical Oncology (ESMO) Gastrointestinal Cancers Congress and AMMF conference.
- **Relevance of the proposal:** The topic and full content of the presentation is relevant to the topic of the WG of the Action, based on solid theoretical background in regard to the acknowledged theoretical framework of the Action; design and methodological grounds; the level of novelty of the material presented. Keywords in the abstract should include cholangiocarcinoma or biliary tract cancer.

- **Collaborative impact:** The potential to foster collaboration among members of the COST Action and beyond, and contribution to the BTC-Network strategy.
- **Merit of the applicant:** The experience and qualifications of the applicant.

Other general criteria for evaluation of ITC Conference Grants include gender balance.
