

Agenda of WG2 Group Meeting
Cost Action 22125

CA22125 - Precision medicine in biliary tract cancer (Precision-BTC-Network)
29 October 2025
17h30 – 19h15 (CET)

Zoom meeting: <https://usal-es.zoom.us/j/83769100951>

17:30 – Welcome (*Pedro M. Rodrigues*)

17:35 – 17:50 – Updates on the activities of WG2 and Summary of the “Liquid Biopsy” Monothematic Conference (*Pedro M. Rodrigues*)

17:50 – 18:00 – Overview of the “Histopathological and molecular methods in biliary tract cancer modelling and their clinical context” Training School (*Stephanie Roessler*)

18:00 – 18:05 – Group photo

18:05 – 18:10 – Updates on the Precision-BTC Disease Catalogue (*Martin Cornillet*)

18:10 – 18:15 – Presentation of the Next-Gen BTC Group (*André Simão*)

18:15 – 18:30 – Metabolite biomarkers for the diagnosis of CCA in patients with PSC & BIOMAP project (*Jesus M. Banales*)

18:30 – 18:45 - The interplay between hepatic fibrosis and tissue factor (TF) up-regulation promotes cancer-associated thrombosis and associates with worst prognosis in intrahepatic cholangiocarcinoma (iCCA) (*Luca Fabris*)

18:45 – 19:00 – Prognostic tissue biomarkers for cholangiocarcinoma after tumor resection: from literature review to multicenter international validation (*Beatriz Val*)

19:00 – 19:15 - “Refinement of histologic subtypes and identification of biomarkers linked to unfavourable prognosis in cholangiocarcinoma: The ENSCCA registries’ framework for digital twin advancement” and updates on the Histological Registry (*Guido Carpino*)

19:15 – Concluding remarks and closure (*Pedro M. Rodrigues*)
