

European Network for the Study
of Cholangiocarcinoma

2024 Translational Seminar Series

On behalf of the International Cholangiocarcinoma Research Network (ICRN), European Network for the Study of Cholangiocarcinoma (ENS-CCA), and Precision-BTC-Net COST-Action, you are invited to attend the next webinar in the Translational Science Seminar Series.

The topic will be ***KRAS as a therapeutic target in cholangiocarcinoma***.

Explore the therapeutic potential of targeting KRAS in cholangiocarcinoma in an upcoming webinar moderated by Drs. Chiara Braconi and Juan Valle.

Dr. Thomas Karasic, Physician Lead at the University of Pennsylvania, will discuss the intricacies and challenges of targeting KRAS in the clinic. **Dr. Ed Jarman**, a Post-doctoral Research Fellow at the University of Edinburgh, will specifically address the genetic interactions with KRasG12D in cholangiocarcinoma's mutational landscape, focusing on pre-clinical data from the Boulter laboratory.

This seminar, aimed at translational and basic scientists and clinicians, focuses on multidisciplinary expertise and collaboration, leading to potential therapeutic interventions for this challenging cancer type. Take advantage of this opportunity to enhance your knowledge and make new connections.

Date: **January 29, 2024**

Time: **9:00am EST/2:00pm UK**
